

T-SERIES ALARM MODULES

A Self-Contained Display Alarm System

The **T-Series Alarm Modules** are perfect for Specialty Displays, End-Caps, Counter-Tops, or anywhere that you want to protect up to 12 items. Using the newest technology that requires no shunt plugs, these T-Series Alarms include a power supply. Just add any of our sensors or electronic recoilers and your displayed products can be protected quickly and easily. They utilize (6) "AA" batteries (not included) for back-up power. Both can be used where AC power is not available. When a sensor is tampered with, the light on the sensor and the light on the alarm module flash to lead you to the location of the tampered sensor.
