The Clothing Control Alarm is a unique, tamper-resistant warning system. It offers the widest variety of sensors available to protect garments. It incorporates a "visual memory" that keeps the LED's flashing until the tampered sensor is identified and corrected. It is the most powerful alarm on the market with up to 16 months battery life. If the alarm is triggered, the battery power is capable of sustaining a continuous alarm for up to 6-1/2 days! It has the "Where-Its-At" option, that flashes a light at the top of the display to help locate the source of the alarm. Its compact size allows protection without being visually obtrusive.
